

Kyubey.Network

---- protocol and integrated services to incubate DApps

Overview of Kyubey.Network

Kyubey Network focus on the development of token incentive Decentralized Autonomous Organization (**DAO**), as well as open and collaborative community.

Designed to improve the boring incentive mode in the open source community and protecting the rights of the project owner and developer, Kyubey Network firstly proposes a standard protocol to **incubate DApps** and provides **integrated services** including but not limited to set up a project, crowdfunding, collaboration, creation and publishment, exchange, as well as developer tools of deploying and automatic packaging.

Overview of KBY

The first smart token offering event launched by Kyubey's DAIBO protocol is Kyubey's own platform token, named as Kyubey Coin (KBY).

Token Utility & Shareholder Rights

Utility functions

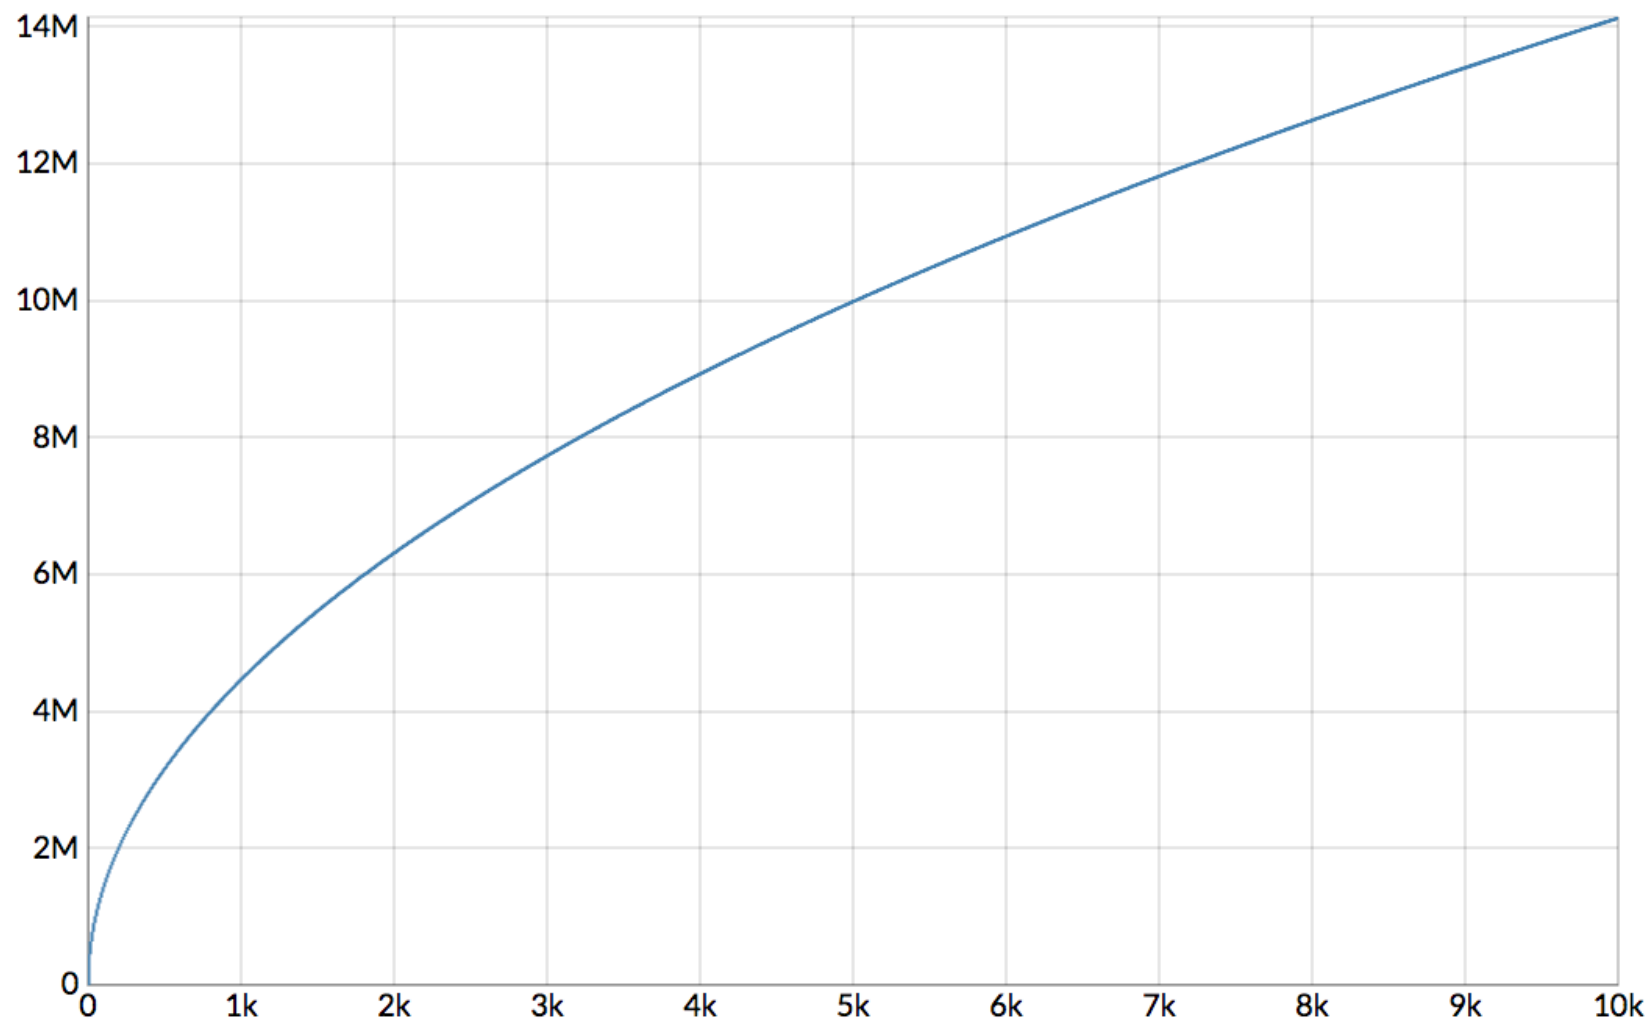

- *Pay for services on all of our platforms*
